

SUMMARY:

Seeking challenging **careers through which Software development**. I can enrich my knowledge and implement the best and willing to be an example for future generation in your organization.

SKILLS:

- **Frontend:** HTML, CSS, JavaScript, React.js, jQuery
 - **Backend:** Python, Django, Node.js, Express.js, PHP, Java
 - **Database:** MongoDB, SQL
-

EDUCATION:

BCA – Kalasalingam Academy of Research and Education

Krishnankoil, Tamil Nadu | CGPA: 6.8 | May 2024

HSSLC – Xavier Mat. Hr. Sec. School

Madurai, Tamil Nadu | Percentage: 59% | 2021

SSLC – Xavier Mat. Hr. Sec. School

Madurai, Tamil Nadu | Percentage: 43% | 2019

CERTIFICATIONS & TRAINING:

- **Python Full Stack Development** – QSpiders, Chennai | Aug 2024
 - **MERN Stack Development** – Shikshaa Simple Learn, Madurai | Mar 2025
-

INTERNSHIP:

- I completed an **WEB DEVELOPMENT** internship at **CODEBIND TECHNOLOGIES** in **CHENNAI** during the period of **JUNE 2023**.
 - I completed an **WEB DEVELOPMENT** internship at **TECH POWER SOLUTIONS** in **CHENNAI** during the period of **DECEMBER 2023**.
 - I completed an **WEB DEVELOPMENT** online internship at **VETRI TECH SOFTWARE SERVICES** during the period **APRIL TO JUNE 2024**.
-

PROJECT :

Project Title: A Research Investigation on the Traceability of Grocery Products from Farmer to Consumers for Neighborhoods

Description:

This project is a web-based grocery ordering system developed using **HTML, CSS, JavaScript, and SQL**, ensuring **direct farm-to-consumer delivery** without middlemen. Farmers can list their **fresh grocery products** such as vegetables, fruits, and grains, while consumers can purchase them directly through the platform. The system provides **real-time tracking**, ensuring transparency, freshness, and fair pricing. The database efficiently stores **farmer details, product inventory, customer orders, and delivery status** for seamless operations.

Project Title: Dream Destination Tours and Travel

Description:

This is a **web-based travel booking application** developed using **HTML, CSS, JavaScript, and ReactJS**, designed to make trip planning **easy and affordable**. Users can explore various **custom travel packages** tailored to their needs and book trips effortlessly. The platform ensures a **user-friendly experience** for all age groups, making it easy even for senior citizens to book their travels. It offers **budget-friendly options**, transparent pricing, and a seamless booking process to provide the best travel experience.

Project Title: Blood Donation Management System

Description:

This is a **web-based application** developed using **Python and Django** to connect blood donors with those in need. Users can register as donors by entering their details like blood group and location. People who need blood can search **for available donors and send requests**. The admin can manage **donor data** and **approve blood requests**. The system is easy to use, works on any device, and helps save lives by **making the blood donation process fast and simple**.
